LEVELS OF MOBILITY

Doctoral student (third cycle) – a person enrolled in a third cycle higher education programme and who has already obtained a second higher education degree or has a recognized equivalent level of learning according to national legislation and practices.

Post-doctoral Researcher – an experienced researcher who is in possession of a doctoral degree or who has at least three years of full-time equivalent research experience, including the period of research training, at a research organisation established in accordance with national legislation and practice after obtaining the degree which formally allowed him/her to embark on a doctoral programme offered by higher education institution.

Undergraduate (student in first cycle) – a person enrolled in a first cycle higher education programme and who will obtain after the completion of the programme a first higher education degree.

Masters student (student in second cycle) – a person enrolled in a second cycle higher education programme and who has already obtained a first higher education degree or has a recognised equivalent level of learning according to national legislation and practices.

Staff – persons who, through their duties, are involved directly in the educational process related to higher education.

The scholarships will contribute to cover the expenses of the individual mobility, including travel costs, subsistence, insurance and participation costs. Scholarships will be awarded to applicants selected by the Partnership.

TYPES OF MOBILITY

Credit transfer programme (=exchange mobility) - Undergraduate, master and doctoral exchange students spend a period of time, whose duration has been specified by the partnership, at the host university. There they will follow courses and/or work on their bachelor or master thesis or – in the case of doctoral students – their research projects or dissertations. Exchange grantees remain enrolled at the home university during the mobility period. The activities to be carried out during the mobility are specified in a Learning Agreement (for undergraduate and master students) or in a Work Plan (for doctoral students). The Learning Agreement (LA) or the Work Plan (WP) have to be agreed on with the academic coordinator at the home university and uploaded to the online application. Upon the grantee's return to the home university, the activities carried out at the host university in accordance with the LA or WP, if successfully completed, have to be fully recognized by the home university as counting towards the student's study programme. The LA or WP, together with a transcript of records issued by the host university for all ECTS completed, will serve as the recognition tools.

Full degree programme (= degree seeking) - ELARCH offers Latina American and European students the opportunity to complete a full degree programme at the EU/LA partner universities. Degree seeking grantees will have the possibility to obtain a degree that will be accompanied by a Diploma Supplement, if applicable. Degree seeking grantees enroll as regular students at the EU/LA host university upon their successful admission.

Short stay programme - Short stay programmes (2/9 months) are available for doctoral students, post-doctoral fellows and staff for research, teaching, specialized training and activities relating to institutional cooperation.

FINANCIAL CONDITION

The beneficiaries will receive, for the whole duration of the mobility abroad, a monthly allowance as follows:

Undergraduate - € 1000 per month
Master - € 1000 per month
Doctorate € 1500 per month
Post-doctorate - € 1800 per month
Staff - € 2500 per month

Two installments will be paid upon the beneficiary's arrival at the host Institution to cover installation costs. The Partnership will cover the beneficiary's travel costs and provide a full health and accident insurance coverage according to the Erasmus Mundus Programme regulations.

Grant holders at any level will not be required to pay any fees or costs to the host university for the duration of the mobility (including tuition and/or registration fees, additional library, student unions, laboratory consumable costs, residence permit, language courses costs).

Exchange students will continue paying their tuition and/or registration fees at their home university and the hosting university must apply a fee waiver policy.

For mobility lower than 10 months, a fee waiver policy must be applied by the host Institution.

The project provides funds for participation costs that will be used by the Partnership to partly compensate the host universities for fees and other costs.

SELECTION PROCESS

Step 1 (Checking) – All the application forms are checked initially by the ELARCH staff. In addition, the application forms will be screened and validated by the home Institution for TG1, by the coordinator for TG2 EU candidates and by the Joint coordinator for TG2 & TG3 Latin American applicants. The validation procedure consists of a technical screening of all the applicants (whether the eligibility requirements are met, respect of the application deadline, completeness and authenticity of uploaded documents, correct TG, minimum requirement to apply, reliability of the documents, etc.)

Step 2 (Checking) - The number of available scholarships is being divided among the different partner universities, taking into account the proposals of the applicants.

Step 3 (Preliminary Selection) – Applications which pass step 1 are reviewed and rated by the host university. The host University will review the applications, check if the admission and language requirements are fulfilled and evaluate the applications in terms of their quality on the basis of the applicant's academic results, verified through transcript of records, university degree/s, Study/research/work plan proposal, motivation and recommendation letters, CV and language skill. In case of rejection, the host university must explain the reason. If not, an evaluation score is given.

The candidate's acceptance is at discretion of the host Institution.

Rejection

If applications are found to be incomplete and/or ineligible (= formally not OK), the reviewers need to clearly indicate the reason for rejecting an application. Rejected applicants will receive an official

notification of rejection via email. This notification will include the reason/s for rejection and provide the applicants with the opportunity to appeal against the decision by a given deadline.

Rejection reason:

- Incomplete file: documents or information (transcript of record, degree,...) is missing
- Unfulfilled admission requirements: the admission requirements for the programme or university are not fulfilled
- Poor motivation: see above
- Insufficient knowledge of language of instruction: the applicant did not prove he/she has adequate knowledge of the language of instruction e.g. lack of TOEFL, IELTS certificates, TOEFL or IELTS scores are not high enough, ...
- Profile of applicant does not match the requested programme: this applies to the academic profile of the applicant, for example the professors at the host university are not specialized in the research field of the PhD applicant.
- The total evaluation score given by the host university was not high enough to be granted a scholarship: the applicant was not initially rejected, but there were applicants with a higher score who obtained the scholarship
- The requested programme is not available: the programme is not on offer (anymore), or the university cannot accept additional candidates.

Step 4 (Final Selection and Allocation of the scholarship) The Selection Committee do a final evaluation of the applications taking into account results of the quality assessment submitted by the partner universities, the Erasmus Mundus cross-cutting issues (gender-balance, equal opportunities and the participation of disabled students and economically disadvantaged students) and the balance of mobility flows agreed upon by the partnership.

According to the type of scholarship (**U**-Undergraduate, **M**-Master, **D**-Doctorate, **PD**-Post Doc, **S**-Staff), the evaluation of applications will comply with the following criteria and **Weighting Factors (WF)**:

- Academic merit/Work experience (WF 3 – **U,M,D,PD,S**);
- Study/Work program proposed (WF 4 - **U,M,D,PD,S**);
- Motivation (WF 1- **U,M,D,PD,S**);
- Language skills (WF 1 - **U,M,D,PD,S**);
- Disabled or economically disadvantaged students (WF 1 - **U,M,D**)

The candidates with the highest score receive a scholarship.

Step 5 (Announcement of selection results) - The coordinator makes separate lists with all the scores of the students per study level, target group and requested mobility duration (e.g. a list with all the target group 2-Post Doc students- 9/10 months scholarship or target group 1-Undergraduates-9 months mobility), plus a list of rejected applications and a reserve list. All applicants will be notified by e-mail of the results of selection, whether they have been selected (Main list) or they are on the reserve list or they has been rejected (*all the lists are published on the ELARCH website*). Only written notifications sent by the Partnership Coordinator are official.

Selected applicants will be required to reply for acceptance or rejection of the scholarship within 10 calendar days. Applicants accepting the scholarship must sign the Scholarship Contract with the host Institution.

Selected applicants, having accepted the scholarship by signing the Scholarship Contract, will be awarded the scholarship and will become grant holders.

Grant holders will be admitted to the host university following the registration procedure as defined by the host university. Partner Universities may not request selected candidates to undergo any further selection.

Grant holders are required to comply with the local admission requirements at the host University and to follow the standard individual registration procedure at the host institution.

Before starting the mobility, grant holders for exchange mobility at the Undergraduate and Master levels will have to draft an ECTS Learning Agreement (template to be downloaded from the project web site), to be signed by both the host and home institutions before the start of mobility.

Applicants in the reserve list may later be selected in case of withdrawal of previously selected applicants. In this case the applicant will be notified and will be required to accept the scholarship as above. Selection of reserves is an ongoing activity and lasts during the current cohort's starting year until the latest date for mobility start.

APPEALS PROCEDURE

Candidates who do not agree with the selection results may engage an appeal procedure sending an explicit request to the ELARCH coordinator clearly stating the reasons for the appeal and within 7 working days after receiving the notification of non-selection. If the request is accepted, it will be granted access to the reasons indicated by the institutions responsible for the validation and evaluation procedures. Specific information and details on the appeals procedure will be given to candidates with e-mail notification of results.

PERSONAL DATA PROCESSING

Applicants' personal data are collected and used in accordance with Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on "the protection of individuals with regard to the processing of personal data and on the free movement of such data".
